3. Undo Breakpoint

```
74    //for undoing any selected transaction
75    public boolean undoTransaction(int rowIndex) {
76      if (rowIndex >= 0 && rowIndex < model.getTransactions().size()) {
77        Transaction removedTransaction = model.getTransactions().get(rowIndex);
78        model.removeTransaction(removedTransaction);
79        view.update(model);
80        // The undo was allowed.      Heather Conboy, 2 weeks ago • Copied over the hw
81        return true;
82      }
83
84      // The undo was disallowed.
85      return false;
86    }
87  }
88
```
